

Year 4 - Wednesday 6<sup>th</sup> May

### Weekly Spellings

optician

magician

politician

electrician

physician

mathematician

technician

beautician

Practise the words in your handwriting book.

### Reading

Read for 20 minutes.

### Maths

Today I would like you to complete Week 2 Lesson 4 - Hundredths on a place value grid

<https://whiterosemaths.com/homelearning/year-4/>

### Music - optional

Mrs Goldsworthy, our ukulele teacher, has sent us some links to musical activities that can be done without an instrument. Watch Mylene Klass then have a go at drumming.

<https://www.youtube.com/watch?v=hA2Z-GVNdxo>

### English

Today you need to finish your poster. Here is a reminder of the instructions:

You need to include its location, size and significance.

Write about the animals that live there.

Write why it is under threat.

Use all the research you have done so far.

You can hand write it or use ICT. You can use Word or Power Point. Draw pictures, print pictures or copy and paste into your document - it depends how you present your work!

When you have finished edit it carefully then you can email it to the class email if you want to share it with me.

### Geography

Starter - See if you can remember the names of the 7 continents and 5 oceans and point to them or write them in your book using the map below.

Main - Draw a sketch map of Australia and label the Great Barrier Reef. Also label the Pacific and Indian Oceans. If you want to make your map more detailed you could also include cities, landmarks, seas and islands. You could even decorate it with Australian animals. Google "Australia map for kids" to get inspired!
