

Year 4 - Tuesday 5th May

Weekly Spellings

optician

magician

politician

electrician

physician

mathematician

technician

beautician

Look up the first 4 words in a dictionary and write the definition.

Reading

Read for at least 20 minutes.

English

Over the next 2 days write an information poster about the Great Barrier Reef.

You need to include its location, size and significance.

Write about the animals that live there.

Write why it is under threat.

Use all the research you have done so far.

You can hand write it or use ICT. You can use

Word or Power Point. Draw pictures, print

pictures or copy and paste into your document

- it depends how you present your work!

I have included a basic fact file below to help if you are finding it difficult.

PSHE

Watch Gilbert the Great

https://www.youtube.com/watch?v=dXOzt_MT96I

Fill in the table below or copy into your book.

Maths

Please follow the link to the White Rose website.

<https://whiterosemaths.com/homelearning/year-4/>

Please complete Week 2 Lesson 3

- Hundredths as decimals

French

Watch the Power Point - My Day in French.

Write sentences for your own day - use the sheet below to help. Choose at least 6. You can draw as well if you want to.

e.g.

À six heures je me lève.

À cinq heures et demie je rentre chez moi.

The Great Barrier Reef

Where Is the Great Barrier Reef?

The Great Barrier Reef is a huge living formation in Australia. It has 2900 reefs and 900 islands. The Great Barrier Reef is in the Coral Sea, off the coast of Queensland, Australia. It runs along the Queensland coast, from near the southern town of Bundaberg to up past Cape York.

How Big Is the Great Barrier Reef?

The Great Barrier Reef is 2600 kilometres long. It is not only the world's largest reef but also the world's largest living structure. The Great Barrier Reef is bigger than Tasmania and Victoria put together. Astronauts can even see it from outer space!

Which Animals Live in the Great Barrier Reef?

The Great Barrier Reef is home to many animals, such as fish, sea turtles, giant clam, seahorses, sea snakes, sea turtles, stingrays, sharks and more. One of the most interesting is the dugong. These unusual animals are closely related to dolphins and whales. They are large mammals and are herbivores. Dugongs feed on the many plants of the Great Barrier Reef. They are hunted by sharks and saltwater crocodiles. Today, there are more than 50,000 dugongs living in Australian waters.

The Great Barrier Reef

Which Plants Grow in the Great Barrier Reef?

Many species of plants grow in the Great Barrier Reef; the majority of which are coral and sponges. 360 species of hard coral grow there, including bottlebrush coral, bubble coral, brain coral, mushroom coral, staghorn coral, tabletop coral and needle coral. Hot weather and warm water are bad for coral and causes 'coral bleaching'.

How Do Aboriginal People Use the Great Barrier Reef?

Aboriginal and Torres Strait Islander people are the traditional owners of the Great Barrier Reef. Aboriginal and Torres Strait Islander people have used the sea to give them food for thousands of years. Today, food from the sea is important to Aboriginal and Torres Strait Islander people, who still collect food and prepare meals using their traditional foods.
