

Thursday 1st May

Our new topic in Science is 'Plants' so we have continued this learning in our Forest School sessions. Today we hunted around the woods for parts of plants and then enjoyed sticking the parts together again. We also did some hammer leaf printing onto material which Mrs Clinch has very kindly made into beautiful bunting for us. Ash class also enjoyed planting some new apples trees on the entrance to the woods. We are looking forward to helping these trees to grow by watering them regularly.
