

## Dragon's Den Planning

Please watch this clip so you get an understanding of what Dragon's Den is about:

<https://www.youtube.com/watch?v=sYeeOarxfng>

Now it is over to you! Below there is a checklist of things you need to consider and then activities to complete. This will be a 2 day project so DON'T RUSH. You need to make your pitch fantastic. You can present your pitch however you want: it could be written with photographs/drawings, it could be a PowerPoint with pictures, it could be a poster-you could even video yourself! I look forward to hearing them!

- You need to decide what your product is going to be.
- Think about why this product is a good idea. What would be the point in having it? Who would use it? Why would it be useful?
- How much would it cost to make? How much would you sell it for? What would your profit be?
- Where could you sell it?

### Tasks:

1. A labelled diagram (drawing) of your product. Make notes around this of some of your ideas about what it would be used for, cost, audience etc.
2. Try and make your product! Use materials that you can find around your house/garden to build your design. Be creative and don't forget to take pictures.
3. Write a speech to present your work. Remember, the aim is to convince me that your idea is a good idea! Watch the YouTube clip again for inspiration if you need to.

The main thing here is to be creative and have fun Year 6. I'm really looking forward to seeing your ideas!
