

Properties of Materials

Well done to those children who managed to complete the material hunt last week. Today, I would like you to have a closer look at these materials. What do they feel like?

Tick the correct words which describe each material.

We did a similar activity on our last day at school. Can you explain what we did in our Science experiments to an adult at home? Can you remember any other property words we used to describe the materials?

	Hard	Soft	Bendy	Rigid	Smooth	Rough
Glass						
Paper						
Wood						
Metal						
Fabric						

Remember to send me your jokes by 6pm this evening (see Friday's activity).
