

Year 4 - Thursday 18th June

Weekly Spellings

space
spacious
fury
furious
mountain
mountainous
envy
envious
courage
courageous

Use the final 5
words in a
sentence.

Reading

Read your book
for at least 20
minutes.

English

Finish your explanation text - edit it
carefully and make any improvements.

Please email it to the class email - I would
love to see your work!

Maths

Today I would like you to complete Summer Term Week 8 Lesson 4 -
Round decimals.

Follow the link to watch the video:

<https://whiterosemaths.com/homelearning/year-4/>

The worksheet and answers are under the home learning tab.

Science

Watch the PowerPoint on
investigating gases.

If you are able to, get up to 5
bottles (the same size - smaller
will be cheaper) of fizzy drinks and
a set of kitchen scales. Follow the
instructions and conduct the
investigation.

The sheet is below.

Maya wants to find the fizziest drink to serve to her friends at her party. You will set up a comparative investigation to find out which fizzy drink has the most carbon dioxide in it, as this is likely to be the fizziest drink. You will weigh each fizzy drink, then shake it until it is flat and weigh it again. The difference between the two weights will tell you how much carbon dioxide is in each drink.

Have a look at the different drinks. Which one do you predict has the most carbon dioxide in it?

How can you make sure your investigation is reliable? Underline the correct option in each sentence.

Use the same amount/different amounts of each fizzy drink.

Shake each drink for the same length/different lengths of time.

Use the same/different weighing scales each time.

Carry out the investigation and complete the table of results below.

Name of drink:	Weight when fizzy:	Weight when flat:	Weight of carbon dioxide (the difference between the two weights):

Look at your results and come to a conclusion. Which fizzy drink has the most carbon dioxide in? Which drink should Maya serve to her friends at her party?
