

Science – Ourselves

Sense of Smell and Taste

Today Year 1 have been looking at their sense of taste and smell. Firstly, they worked with their table to use their sense of smell. They were given covered plastic cups and some labels and had to match each cup to the correct label. They had to recognise the smell of orange, onion, coffee, toothpaste, soap and chocolate.

Secondly, Year 1 completed a taste test where they had to find something sweet, sour, bitter and salty.
