

TILLY : Hello, this is the Switch Off Team.

LILY : Some teachers don't understand how important electricity is.

IZZY : That's right. Electricity plays a big part in the world.

HOLLY : All of this is true. Every light that you leave on is just wasting energy.

NEVE : I think that since I joined the Switch Off Team I've learned more about electricity.

REUBEN : Me too. It's so much fun going around the classes and seeing if they have turned off their electricity..

HAYDEN : Also, every light that you turn off saves pennies for the school.

BEN : It also helps to stop global warming.

TILLY : We've got lots of ideas. How about you?

LILY : If you've got any ideas then come to us with the Green Badges.

IZZY : The only lights we should leave on are the ones we are using..

HOLLY : That's right. This whole assembly is about people turning their lights off.

NEVE ; I love this assembly. Now I know to keep my lights off.

REUBEN : I love it too. It's so good letting you know when to turn your lights off.

HAYDEN : And finally here's the last fact of the day...

BEN : Help us to keep our school running and help us to save the planet.

TILLY : And we are The Switch Off Team.
